What keeps selling out?

Eight completed weeks | 2026-08-23 to 2026-10-17

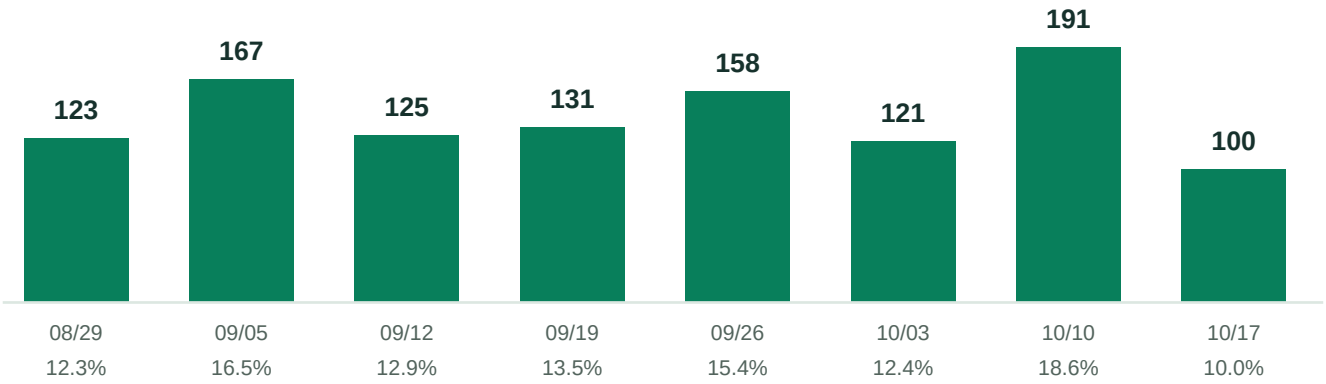
Source generated 2026-10-19T20:39:34.448Z. Historical weekly data in America/Los_Angeles.

Eligible products	Sellout events	Repeat products (2+)	Weighted sell-through
1,799	1,116	213	10.3%

OG Chem 14g Bong Buddies has the most observed sellout weeks: 6 of 8 offered weeks (75.0%). It sold 1,539 of 1,588 allocated units across this window.

213 products exhausted allocations in at least two weeks; 36 did so in at least three. These are observed repeat events, not proof of unmet retail demand.

Exact sellout occurrences by week



The latest week ended 2026-10-17 with 100 sellouts among 996 eligible products (10.0%). The prior week recorded 191. Product mix and allocations change, so this comparison does not by itself show a change in consumer demand.

Scope: allocation exhaustion measured from weekly order totals. Submitted and pending orders are included. Daily sellout timing, retail inventory outages and lost sales cannot be calculated from this endpoint.

The repeat-sellout leaderboard

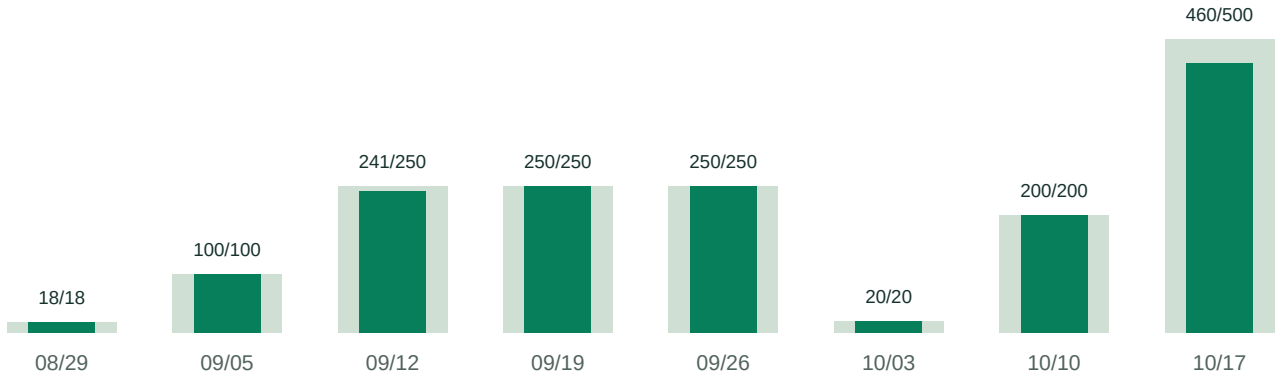
Products below were offered in at least four of the eight weeks and sold out at least twice. Ranked by exact sellout weeks, then frequency and units sold. Coverage is shown so short histories remain visible.

Product	Weeks out	Frequency	Sold / allocated	Sell-through
OG Chem 14g Bong Buddies	6/8	75.0%	1,539 / 1,588	96.9%
Diesel Mintz Bong Buddies	5/5	100.0%	947 / 947	100.0%
Trophy Wife 14g Bong Buddies	4/6	66.7%	845 / 861	98.1%
Dragonberry Kush Bong Buddies	4/6	66.7%	305 / 310	98.4%
Jack & Coke Bong Buddies	4/8	50.0%	816 / 968	84.3%
Banana Pudding 1g Preroll	3/4	75.0%	3,380 / 4,780	70.7%
Kauai LR Dabstract 1g AIO - (S)	3/4	75.0%	2,455 / 2,475	99.2%
Gold Digger LR Panda Cake Batter	3/4	75.0%	914 / 1,316	69.5%
Lemon Fresh LR Dabstract 1g AIO - (S)	3/4	75.0%	749 / 769	97.4%
Chronberry Crunch LR Dabstract 1g C-Cell - (I)	3/4	75.0%	606 / 710	85.4%
Platinum Flower (Grand Daddy Purple Bx2 - Platinum Line/14g)	3/4	75.0%	173 / 180	96.1%
Orange Zkittlez Platinum Bong Buddies	3/4	75.0%	95 / 100	95.0%
Trophy Wife 10g Mega Roll	3/4	75.0%	75 / 80	93.8%
Forbidden Fruit Snickle Fritz Sugar	3/5	60.0%	2,056 / 2,284	90.0%
Grand Daddy Purple - Bangers 10pk	3/5	60.0%	1,217 / 1,289	94.4%
Post Melon Platinum Bong Buddies	3/5	60.0%	723 / 733	98.6%
Wave Rider Platinum Bong Buddies	3/5	60.0%	419 / 429	97.7%
Afghani Sour Bong Buddies	3/5	60.0%	362 / 402	90.0%
Scotch & Soda 28g Preroll Pack	3/5	60.0%	115 / 191	60.2%
Raspberry Zkittlez 28g Preroll Pack	3/5	60.0%	88 / 134	65.7%

Frequency = sold-out weeks / eligible offered weeks. Sell-through = total units sold / total units allocated. A product absent from a week is not counted as a failed sale. All 1,799 eligible products and all original source rows are available in the workbook.

Allocation size changes the interpretation

OG Chem 14g Bong Buddies



Pale: allocated units. Green: sold units. Labels: sold / allocated.

OG Chem 14g Bong Buddies sold out 6 times, but its latest-week state is near sellout. Its current consecutive calendar-week sellout streak is 0; its longest streak was 4. Review the weekly allocation bars before making a supply decision.

Strong rates with limited history

Product	Sold-out / offered	Sold / allocated
Post Melon - Platinum 1g Preroll	3 / 3	4,338 / 4,338
Gorilla Diesel LR Dabstract 1g C-Cell - (S)	3 / 3	112 / 112
Bone Collector Bong Buddies	2 / 2	788 / 788
Guava Cupcakes - Bangers 10pk	2 / 2	599 / 599
Sasquatch Breath Bong Buddies	2 / 2	378 / 378
Platinum Flower (Chicken & Waffles - Platinum Line/14g)	2 / 2	275 / 275

Practical review sequence: start with repeated sellouts on meaningful, stable allocations; confirm pending orders and product availability; inspect recent weeks; then discuss supply with the team. A high rate from one or two small allocations is a watch item. No automatic production, pricing or lost-revenue estimate is supported.

Where sellouts concentrate

Counts show exhausted product-week allocations. Rates use eligible product-weeks within each group. Unit sell-through is weighted by allocation volume; it is a different measure from sellout frequency.

Brands

Group	Products	Events	Event rate	Sell-through
Phat Panda	842	716	22.8%	40.7%
Dabstract	354	249	20.6%	50.7%

Definitions, audit and source

Source. https://api-intelligence.getbamboo.com/api/reports/allocation-sell-through?limit=8

Time window. 8 completed Sunday-Saturday allocation periods, 2026-08-23 to 2026-10-17; source timezone America/Los_Angeles.

Exact sellout. A valid, finite, positive allocation with positive sold units and zero remaining units. Overselling and inconsistent quantities are exceptions rather than automatic sellouts.

Near sellout. At least 90% of an eligible allocation sold; exact sellouts are included in the 90%+ measure but separately labeled.

Frequency and coverage. Frequency is exact sold-out weeks divided by weeks offered. Coverage is offered weeks divided by eight. Streaks require consecutive calendar weeks and break when a product is absent.

Weighted sell-through. Total eligible sold units divided by total eligible allocated units. Weekly percentages are not averaged.

Eligibility. Trade samples, non-marijuana merchandise, zero/unlimited allocations and anomalous records are excluded from the analytical denominator. The full original source is retained.

Sales status. submitted, pending, approved, processing, shipped, dropped_off, received. These are wholesale order totals, including submitted and pending orders.

Missing detail. No store-level records, dated sellout events, restock events, within-week timestamps, duration unavailable or lost-demand observations are provided.

Refresh. Weekly automated refresh recreates the dataset, workbook, PDF and CSVs from the latest eight completed periods. The dashboard displays source freshness and reports stale or failed loads.

Audit measure	Count
Original product-week rows	9,282
Eligible product-weeks	7,968
Excluded merchandise	397
Excluded trade samples	858
Excluded zero/unlimited allocations	59
Anomaly records	0
