What keeps selling out?

Eight completed weeks | 2026-08-30 to 2026-10-24

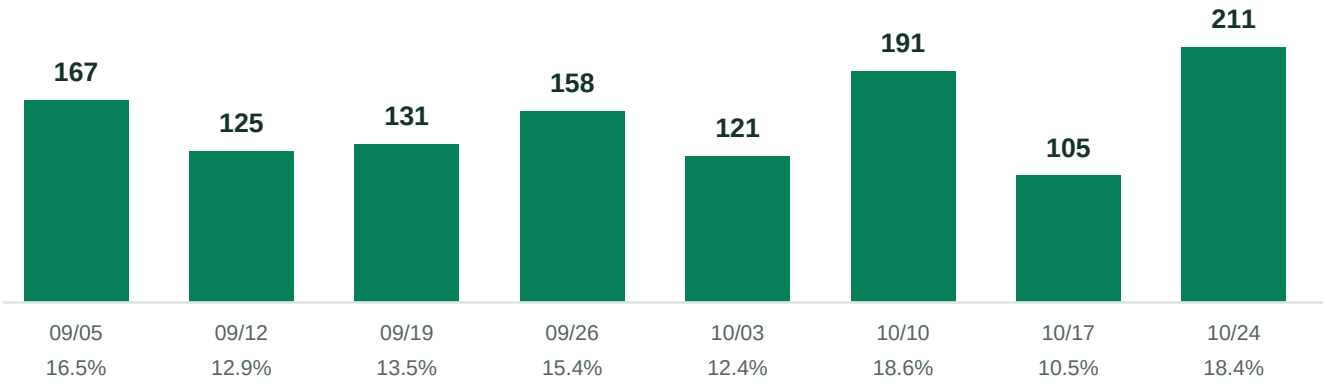
Source generated 2026-10-26T20:38:40.573Z. Historical weekly data in America/Los_Angeles.

Eligible products	Sellout events	Repeat products (2+)	Weighted sell-through
1,858	1,209	248	10.2%

Diesel Mintz Bong Buddies has the most observed sellout weeks: 5 of 5 offered weeks (100.0%). It sold 1,031 of 1,031 allocated units across this window.

248 products exhausted allocations in at least two weeks; 43 did so in at least three. These are observed repeat events, not proof of unmet retail demand.

Exact sellout occurrences by week



The latest week ended 2026-10-24 with 211 sellouts among 1145 eligible products (18.4%). The prior week recorded 105. Product mix and allocations change, so this comparison does not by itself show a change in consumer demand.

Scope: allocation exhaustion measured from weekly order totals. Submitted and pending orders are included. Daily sellout timing, retail inventory outages and lost sales cannot be calculated from this endpoint.

The repeat-sellout leaderboard

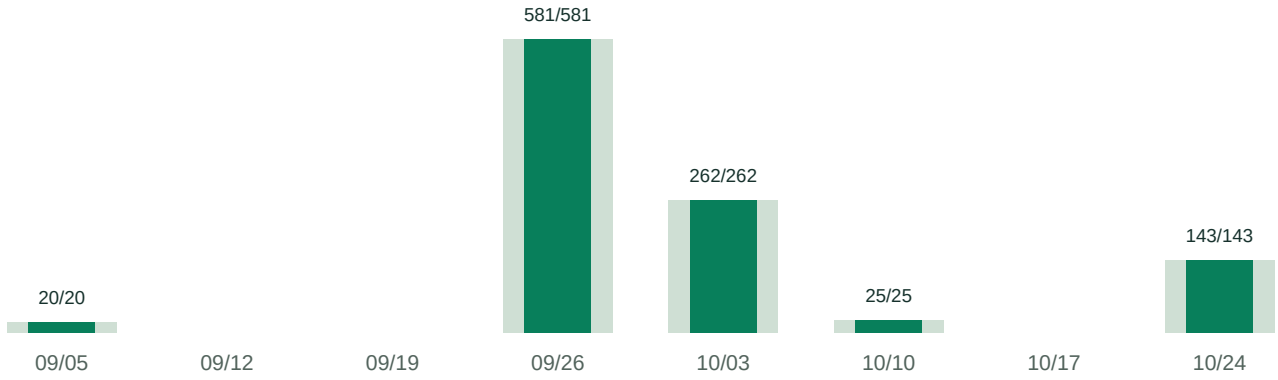
Products below were offered in at least four of the eight weeks and sold out at least twice. Ranked by exact sellout weeks, then frequency and units sold. Coverage is shown so short histories remain visible.

Product	Weeks out	Frequency	Sold / allocated	Sell-through
Diesel Mintz Bong Buddies	5/5	100.0%	1,031 / 1,031	100.0%
OG Chem 14g Bong Buddies	5/7	71.4%	1,521 / 1,570	96.9%
Trophy Wife 14g Bong Buddies	4/6	66.7%	845 / 861	98.1%
Dragonberry Kush Bong Buddies	4/6	66.7%	305 / 310	98.4%
Truffle Shuffle Bong Buddies	4/7	57.1%	659 / 985	66.9%
Gary Payton Bong Buddies	4/8	50.0%	1,862 / 2,295	81.1%
Jack & Coke Bong Buddies	4/8	50.0%	1,166 / 1,360	85.7%
Banana Pudding 1g Preroll	3/4	75.0%	3,380 / 4,780	70.7%
Phat Panda Flower (Neon Nectar/3.5g)	3/4	75.0%	659 / 749	88.0%
Chronberry Crunch LR Dabstract 1g C-Cell - (I)	3/4	75.0%	635 / 739	85.9%
Gorilla Diesel LR Dabstract 1g C-Cell - (S)	3/4	75.0%	616 / 767	80.3%
Chronberry Crunch 28g Preroll Pack	3/4	75.0%	148 / 157	94.3%
Phat Panda Flower (White Gummie Bears/28g)	3/4	75.0%	143 / 144	99.3%
Triple Burger Bong Buddies	3/5	60.0%	1,348 / 1,392	96.8%
Post Melon Platinum Bong Buddies	3/5	60.0%	723 / 733	98.6%
Phat Panda Flower (Afghani Sour/7g)	3/5	60.0%	551 / 589	93.5%
Platinum Flower (Kauai - Platinum Line/14g)	3/5	60.0%	531 / 565	94.0%
Afghani Sour Bong Buddies	3/5	60.0%	362 / 402	90.0%
Grand Daddy Purple - Bangers 10pk	3/6	50.0%	1,726 / 2,049	84.2%
Sunset Sherbert Bong Buddies	3/6	50.0%	1,446 / 1,967	73.5%

Frequency = sold-out weeks / eligible offered weeks. Sell-through = total units sold / total units allocated. A product absent from a week is not counted as a failed sale. All 1,858 eligible products and all original source rows are available in the workbook.

Allocation size changes the interpretation

Diesel Mintz Bong Buddies



Pale: allocated units. Green: sold units. Labels: sold / allocated.

Diesel Mintz Bong Buddies sold out 5 times, but its latest-week state is sellout. Its current consecutive calendar-week sellout streak is 1; its longest streak was 3. Review the weekly allocation bars before making a supply decision.

Strong rates with limited history

Product	Sold-out / offered	Sold / allocated
Blueberry Diesel LR Dabstract 1g AIO - (S)	3 / 3	713 / 713
Sasquatch Breath Bong Buddies	3 / 3	396 / 396
Skywalker Haze Bong Buddies	3 / 3	190 / 190
Gary Payton 14g Bong Buddies	3 / 3	97 / 97
Platinum Flower (Grand Daddy Purple Bx2 - Platinum Line/14g)	3 / 3	80 / 80
Orange Zkittlez Platinum Bong Buddies	3 / 3	76 / 76

Practical review sequence: start with repeated sellouts on meaningful, stable allocations; confirm pending orders and product availability; inspect recent weeks; then discuss supply with the team. A high rate from one or two small allocations is a watch item. No automatic production, pricing or lost-revenue estimate is supported.

Where sellouts concentrate

Counts show exhausted product-week allocations. Rates use eligible product-weeks within each group. Unit sell-through is weighted by allocation volume; it is a different measure from sellout frequency.

Brands

Group	Products	Events	Event rate	Sell-through
Phat Panda	885	811	25.0%	40.8%
Dabstract	347	240	19.7%	48.6%

Definitions, audit and source

Source. https://api-intelligence.getbamboo.com/api/reports/allocation-sell-through?limit=8

Time window. 8 completed Sunday-Saturday allocation periods, 2026-08-30 to 2026-10-24; source timezone America/Los_Angeles.

Exact sellout. A valid, finite, positive allocation with positive sold units and zero remaining units. Overselling and inconsistent quantities are exceptions rather than automatic sellouts.

Near sellout. At least 90% of an eligible allocation sold; exact sellouts are included in the 90%+ measure but separately labeled.

Frequency and coverage. Frequency is exact sold-out weeks divided by weeks offered. Coverage is offered weeks divided by eight. Streaks require consecutive calendar weeks and break when a product is absent.

Weighted sell-through. Total eligible sold units divided by total eligible allocated units. Weekly percentages are not averaged.

Eligibility. Trade samples, non-marijuana merchandise, zero/unlimited allocations and anomalous records are excluded from the analytical denominator. The full original source is retained.

Sales status. submitted, pending, approved, processing, shipped, dropped_off, received. These are wholesale order totals, including submitted and pending orders.

Missing detail. No store-level records, dated sellout events, restock events, within-week timestamps, duration unavailable or lost-demand observations are provided.

Refresh. Weekly automated refresh recreates the dataset, workbook, PDF and CSVs from the latest eight completed periods. The dashboard displays source freshness and reports stale or failed loads.

Audit measure	Count
Original product-week rows	9,427
Eligible product-weeks	8,115
Excluded merchandise	400
Excluded trade samples	862
Excluded zero/unlimited allocations	50
Anomaly records	0
